

ExSite® Enhanced Compact 2 Series

6 MP

See in total darkness or blinding light within hazardous environments

The ExSite® Enhanced 2 explosion-proof camera system is purpose-built to monitor operations and control processes in hazardous locations with risks of explosion, due to the presence of flammable liquids, gases or dust. This camera system offers form factors in PTZ, IR PTZ, bullet, and compact bullet and is built with corrosion-resistant stainless steel construction.

For sites requiring strict compliance measures, this camera system adheres to international standards (UL, CSA, ATEX, IECEx, UKCA, INMETRO and KCs). It provides operators crisp and clear evidence with up to 1.6X optical zoom with true WDR and low light capabilities for challenging lighting conditions common to hazardous areas.

Supported Analytics Events*	
Objects in Area	The event is triggered when the selected object type moves into the region of interest. This event can be used to count objects.
Object Loitering	The event is triggered when the selected object type moves into the region of interest, then stays for an extended amount of time.
Objects Crossing Beam	The event is triggered when the specified number of objects have crossed the directional beam that is configured over the camera's field of view. The beam can be unidirectional or bidirectional.
Object Appears or Enters Area	The event is triggered by each object that enters the region of interest.
Object Not Present in Area	The event is triggered when no objects are present in the region of interest.
Objects Enter Area	The event is triggered when the specified number of objects have entered the region of interest.
Objects Leave Area	The event is triggered when the specified number of objects have left the region of interest.
Object Stops in Area	The event is triggered when an object moves into a region of interest and then stops moving for the specified threshold time.
Direction Violated	The event is triggered when an object moves in the prohibited direction of travel.
Sabotage Detection	The event is triggered when the scene unexpectedly changes.
